

# Safety hooped ladders **SELF SYSTEM** aluminium

Self System is the new SVELT project that allows the operator to mount the ladder and cage directly on site. The elements have no welds and must be assembled with the new Quick Screwing system designed by Svelt. In this way the ladder is compact and economical to transport, and quick to assemble on site. A system with pre-composed standard modules that allows Authorized Resellers to keep predefined packages in stock in order to respond to various requests. With test certificate.

*ASSEMBLY TIMING REDUCED!!! 50% COMPARED TO OTHERS LADDERS IN THE MARKET*

COMPACT TRANSPORT

TESTED ACCORDING TO EN14122
